Report

Of

PRODUCTION COORDINATION IN ANIMATION PRODUCTION

Submitted

To

School of Computor Science and Engineering
IILM University, Greater Noida. U.P.

In partial fulfilment of the requiremeıts of degree of

B.Tech CSE

By

Roll Number of Student: 25SCS1003001471

Name of Student: RAGHAV MAHAJAN

Batch: 2025-29

2026-27

CANDIDATE'S DECLARATION

I, RAGHAV MAHAJAN do hereby declare that the internship report titled **"production coordination in animation production"** has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluably constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I express my gratitude to my parents for their blessings.

INTERNSHIP CERTIFICATE

This is to certify that **Raghav Mahajan** of **Institute of Integrated Learning in Management** has successfully completed an internship with **Digitoonz Media & Entertainment Pvt. Ltd.** from **10 June 2026** to **10 July 2026** in the role of **Production Coordinator Intern** in the **Production Department**.

During the internship, the intern was involved in supporting production coordination activities, monitoring project progress, maintaining production records, coordinating with team members, and assisting in tracking tasks and deadlines across the production pipeline.

Throughout the internship, the intern developed practical skills in **production coordination, project tracking, communication, team coordination, time management, documentation, and understanding of animation production workflows.** The internship provided valuable exposure to professional production processes and day-to-day project management.

We appreciate their efforts and contribution during the internship and wish them success in their future academic and professional endeavors.

CHAPTER 4

PROJECT DESCRIPTION

4.1 Introduction

The internship report titled **“Production Coordination in Animation Production”** documents the practical learning and professional exposure gained during the internship at **Digitoonz Media & Entertainment Pvt. Ltd.**. The internship was completed from **10 June 2026 to 10 July 2026** in the role of **Production Coordinator Intern** within the Production Department.

The work focused on supporting production coordination activities within an animation-production environment. The responsibilities described in the completion certificate included monitoring project progress, maintaining production records, coordinating with team members, and assisting with tracking tasks and deadlines across the production pipeline.

This project description presents the internship from an academic and process-oriented perspective. It explains the organizational context, the coordination problem addressed, objectives, scope, tools, workflow architecture, methodology, and expected outcomes. The report is based on the responsibilities and skills documented in the official internship completion certificate.

Project Theme: Production coordination, task tracking, documentation and communication support for animation production workflows.

4.2 Organization Profile

Digitoonz Media & Entertainment Pvt. Ltd. is the organization where the internship was completed. The official internship certificate identifies the organization as the host for the Production Coordinator Intern role in the Production Department.

The internship environment provided exposure to professional production processes and day-to-day project management. The certificate specifically records experience related to animation production workflows, production coordination, project tracking, communication, documentation and team coordination.

The certificate lists the organization's locations in **Noida** and **Kolkata**. The Noida office is identified at C-29, Sector 6, Noida, while the Kolkata location is listed at Millennium City IT Park, Sector V, Kolkata. These details are reproduced from the internship certificate.

From the internship perspective, the organization profile is relevant because the work environment connects production planning, people coordination, progress monitoring and deadline management with the broader animation production pipeline.

4.3 Problem Statement

Animation production involves a sequence of interconnected activities in which tasks, people, records and deadlines need to remain coordinated. During a production cycle, incomplete or delayed information can make it difficult for teams to understand current progress and upcoming priorities.

The internship therefore addressed a practical coordination problem: **how to support the organized tracking and communication of production tasks so that project progress, records and deadlines remain visible and manageable within the production workflow.**

The problem was approached from a production-coordination perspective rather than by developing a stand-alone software application. The role required maintaining production information, monitoring progress, coordinating with team members and assisting in task and deadline tracking.

A structured coordination process helps reduce ambiguity, improves visibility of work status and supports timely communication between the people involved in production. The internship provided practical exposure to these operational requirements.

4.4 Project Objectives

1. **Understand production coordination:** Gain practical understanding of how production activities are organized and coordinated in an animation environment.

2. **Monitor project progress:** Support the tracking of work status and ongoing project activities.

3. **Maintain production records:** Keep relevant production information organized and accessible for coordination purposes.

4. **Coordinate with team members:** Support communication and follow-up among people involved in the production workflow.

5. **Track tasks and deadlines:** Assist in maintaining visibility of assigned tasks, priorities and expected timelines.

6. **Develop professional skills:** Strengthen communication, teamwork, time management, documentation and problem-solving abilities.

7. **Gain tool exposure:** Apply spreadsheet-based working practices, including Excel/Google Sheets, for tracking and documentation.

8. **Understand project management:** Observe how day-to-day project management practices contribute to production continuity.

4.5 Scope of the Project

The scope of this internship project is limited to production coordination support within an animation-production context. It covers the operational activities that were explicitly reflected in the internship completion certificate.

Area	Scope Covered
Production Coordination	Supporting coordination activities within the Production Department.
Progress Monitoring	Monitoring project progress and maintaining visibility of ongoing work.
Records & Documentation	Maintaining production records and organizing relevant information.
Team Coordination	Coordinating and communicating with team members as required.
Task & Deadline Tracking	Assisting in tracking tasks, priorities and deadlines across the production pipeline.
Professional Development	Building communication, teamwork, time management, problem-solving and documentation skills.
Tools	Working with Excel/Google Sheets for production-related tracking and documentation.

The scope does not claim ownership of animation design, character animation, rendering or software development activities unless specifically documented elsewhere. The internship evidence primarily supports a production-coordination and project-tracking role.

4.6 Technologies and Tools Used

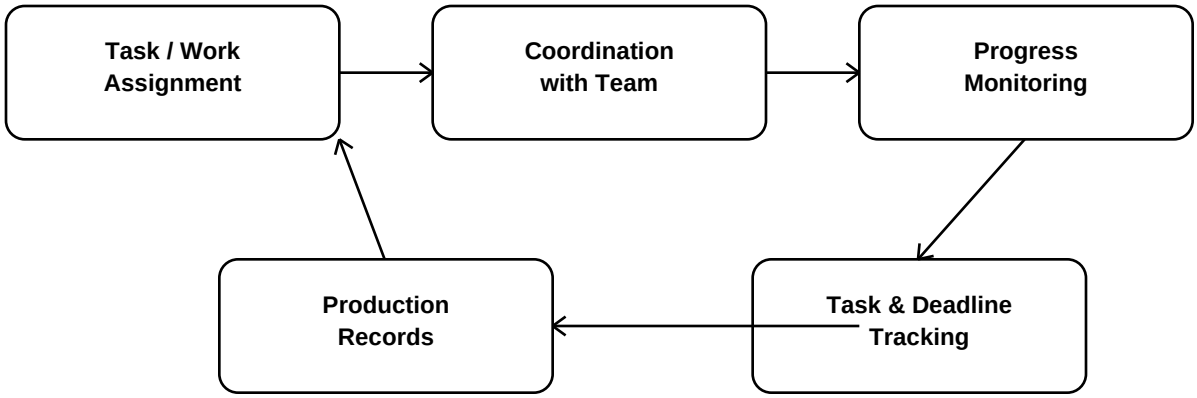

The internship completion certificate specifically mentions **Excel/Google Sheets** along with communication, documentation and production workflow skills. These tools and practices supported the coordination-oriented nature of the internship.

Tool / Technology	Use in the Internship Context
Microsoft Excel	Spreadsheet-based organization, tracking and maintenance of production-related information.
Google Sheets	Online spreadsheet-based tracking and collaborative documentation where applicable.
Email / Communication	Professional communication and coordination with team members and HR.
Production Records	Documentation and maintenance of information required for production tracking.
Task & Deadline Tracking	Following assigned activities, progress and expected completion timelines.

In addition to tools, the internship required process skills such as communication, teamwork, time management, documentation and problem-solving. These skills were explicitly recognized in the completion certificate.

4.7 System Architecture

Because the internship project was focused on production coordination rather than software development, the architecture below represents a **conceptual production-coordination workflow**. It shows how work information can move from task assignment through coordination, monitoring, documentation and deadline tracking.

Conceptual workflow derived from the internship responsibilities described in the completion certificate.

Workflow interpretation: Production tasks are assigned and communicated to the relevant team members. Progress is then monitored and reflected in production records. Task and deadline information is tracked to support follow-up and timely coordination. The cycle continues as project status changes.

This architecture is a process model prepared from the responsibilities recorded in the internship certificate; it is not presented as a proprietary internal system architecture of Digitoonz.

4.8 Methodology

A structured, observation-and-coordination-based methodology was followed during the internship. The methodology emphasizes understanding the production workflow, organizing information, monitoring progress and communicating with the team.

Step	Activity	Purpose
1	Understand the workflow	Become familiar with production activities, responsibilities and timelines.
2	Organize information	Maintain production records and tracking information in an orderly form.
3	Coordinate	Communicate with team members and support required follow-ups.
4	Monitor	Observe project progress and identify pending or ongoing tasks.
5	Track deadlines	Assist in keeping expected timelines and task status visible.
6	Document	Maintain relevant records and support clear communication of project info
7	Review & improve	Use feedback and day-to-day experience to improve coordination and time

The methodology reflects the practical nature of the internship and aligns with the certificate’s description of production coordination, project tracking, documentation, communication and team coordination activities.

4.9 Expected Outcomes

1. A practical understanding of production coordination within an animation-production environment.

2. Improved ability to monitor project progress and follow task status.

3. Better understanding of maintaining production records and documentation.

4. Improved communication and coordination with team members.

5. Stronger time-management skills through task and deadline tracking.

6. Practical exposure to Excel/Google Sheets for tracking and documentation.

7. Greater understanding of day-to-day project management and production workflows.

8. Development of professional skills including teamwork, problem-solving and structured communication.

The internship completion certificate confirms that these areas contributed to the intern's practical skill development and professional exposure. It specifically recognizes production coordination, project tracking, communication, team coordination, time management, documentation, problem-solving and understanding of animation production workflows.

4.10 Certificates of Completion and Other Communication Mail Proof

The official **Internship Completion Certificate** issued by Digitoonz Media & Entertainment Pvt. Ltd. is attached as **Chapter 3** of this report without alteration. It confirms completion of the internship from 10 June 2026 to 10 July 2026 in the role of Production Coordinator Intern.

The following page also includes the **HR communication email proof** received from Payal Shukla, HR Executive, Digitoonz. The email states that the internship completion certificate was being provided and that the certificate was attached for reference. The screenshot is reproduced as supporting evidence.
